

FLOS

kelvin LED

FLOS

kelvin LED
design by Antonio Citterio with Toan Nguyen

a new vision in
LED technology

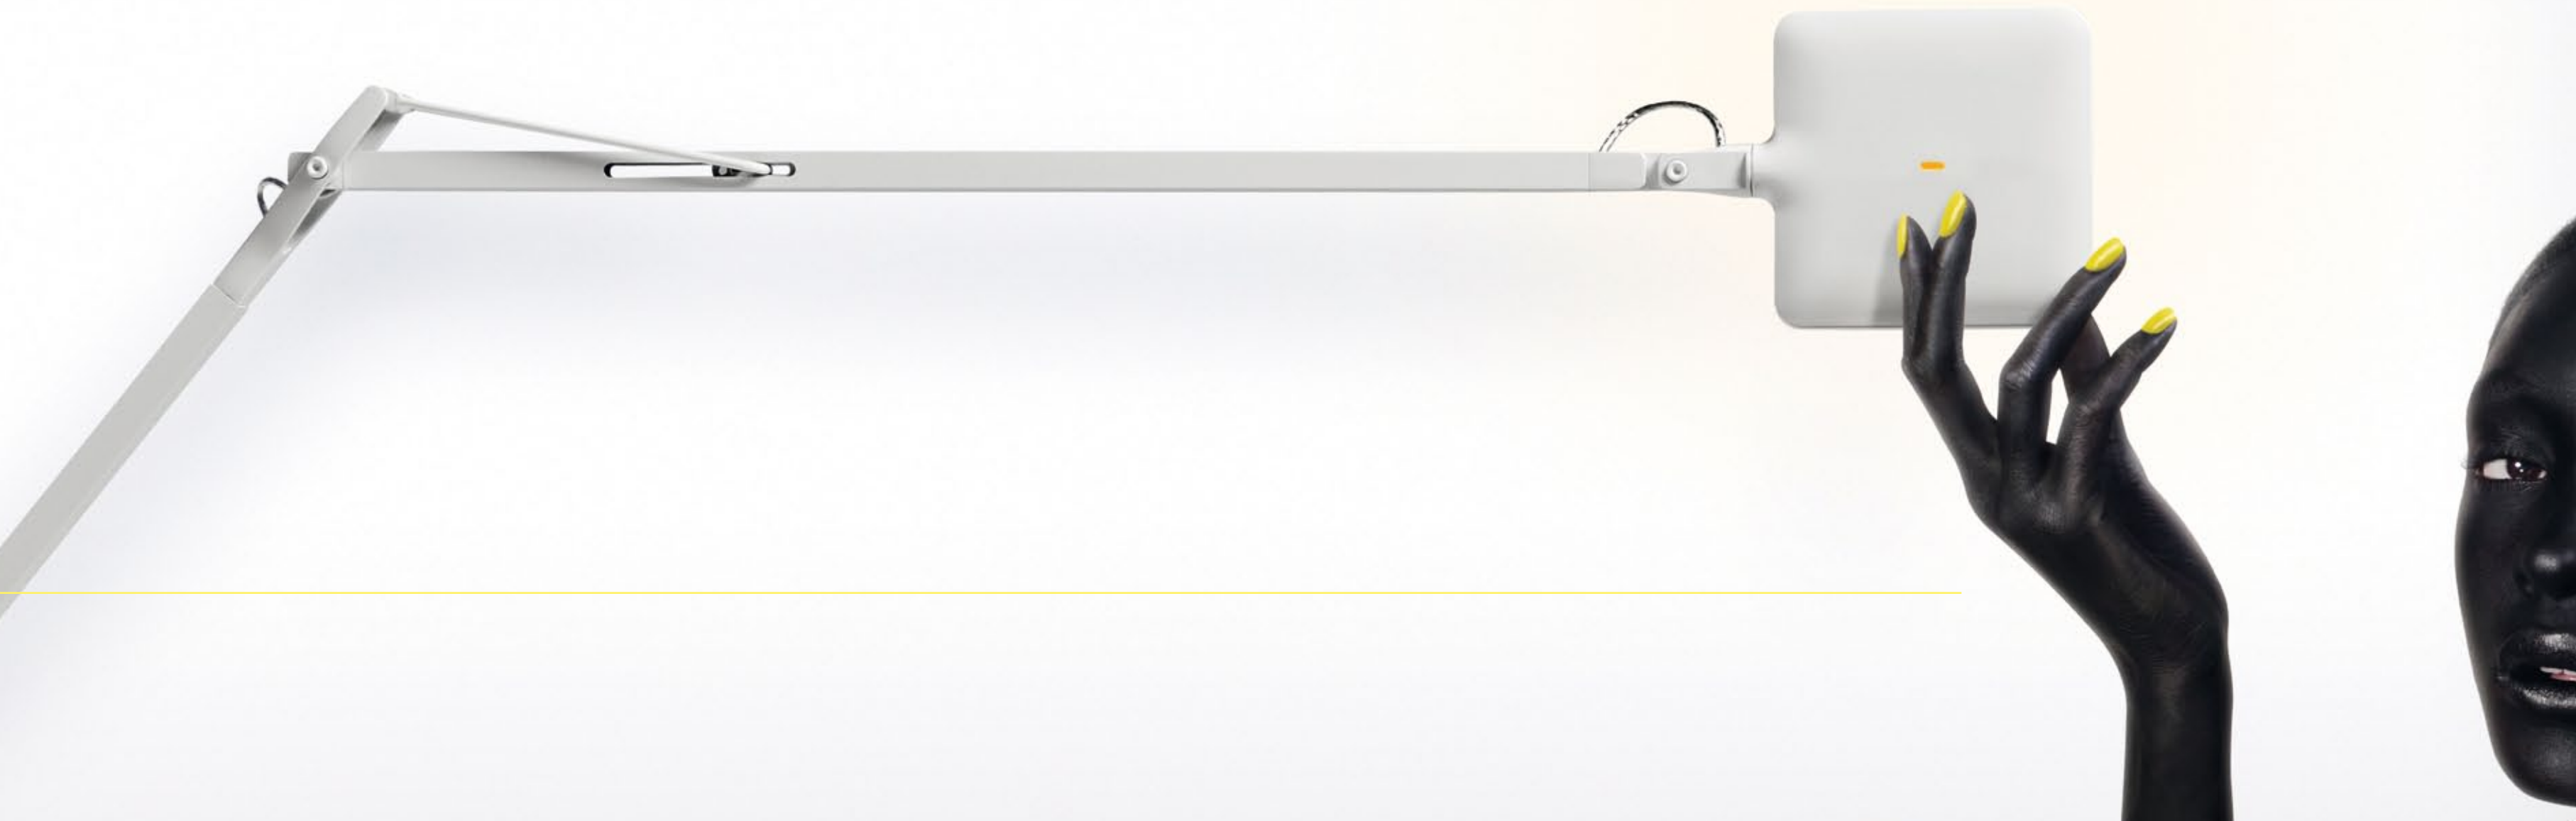

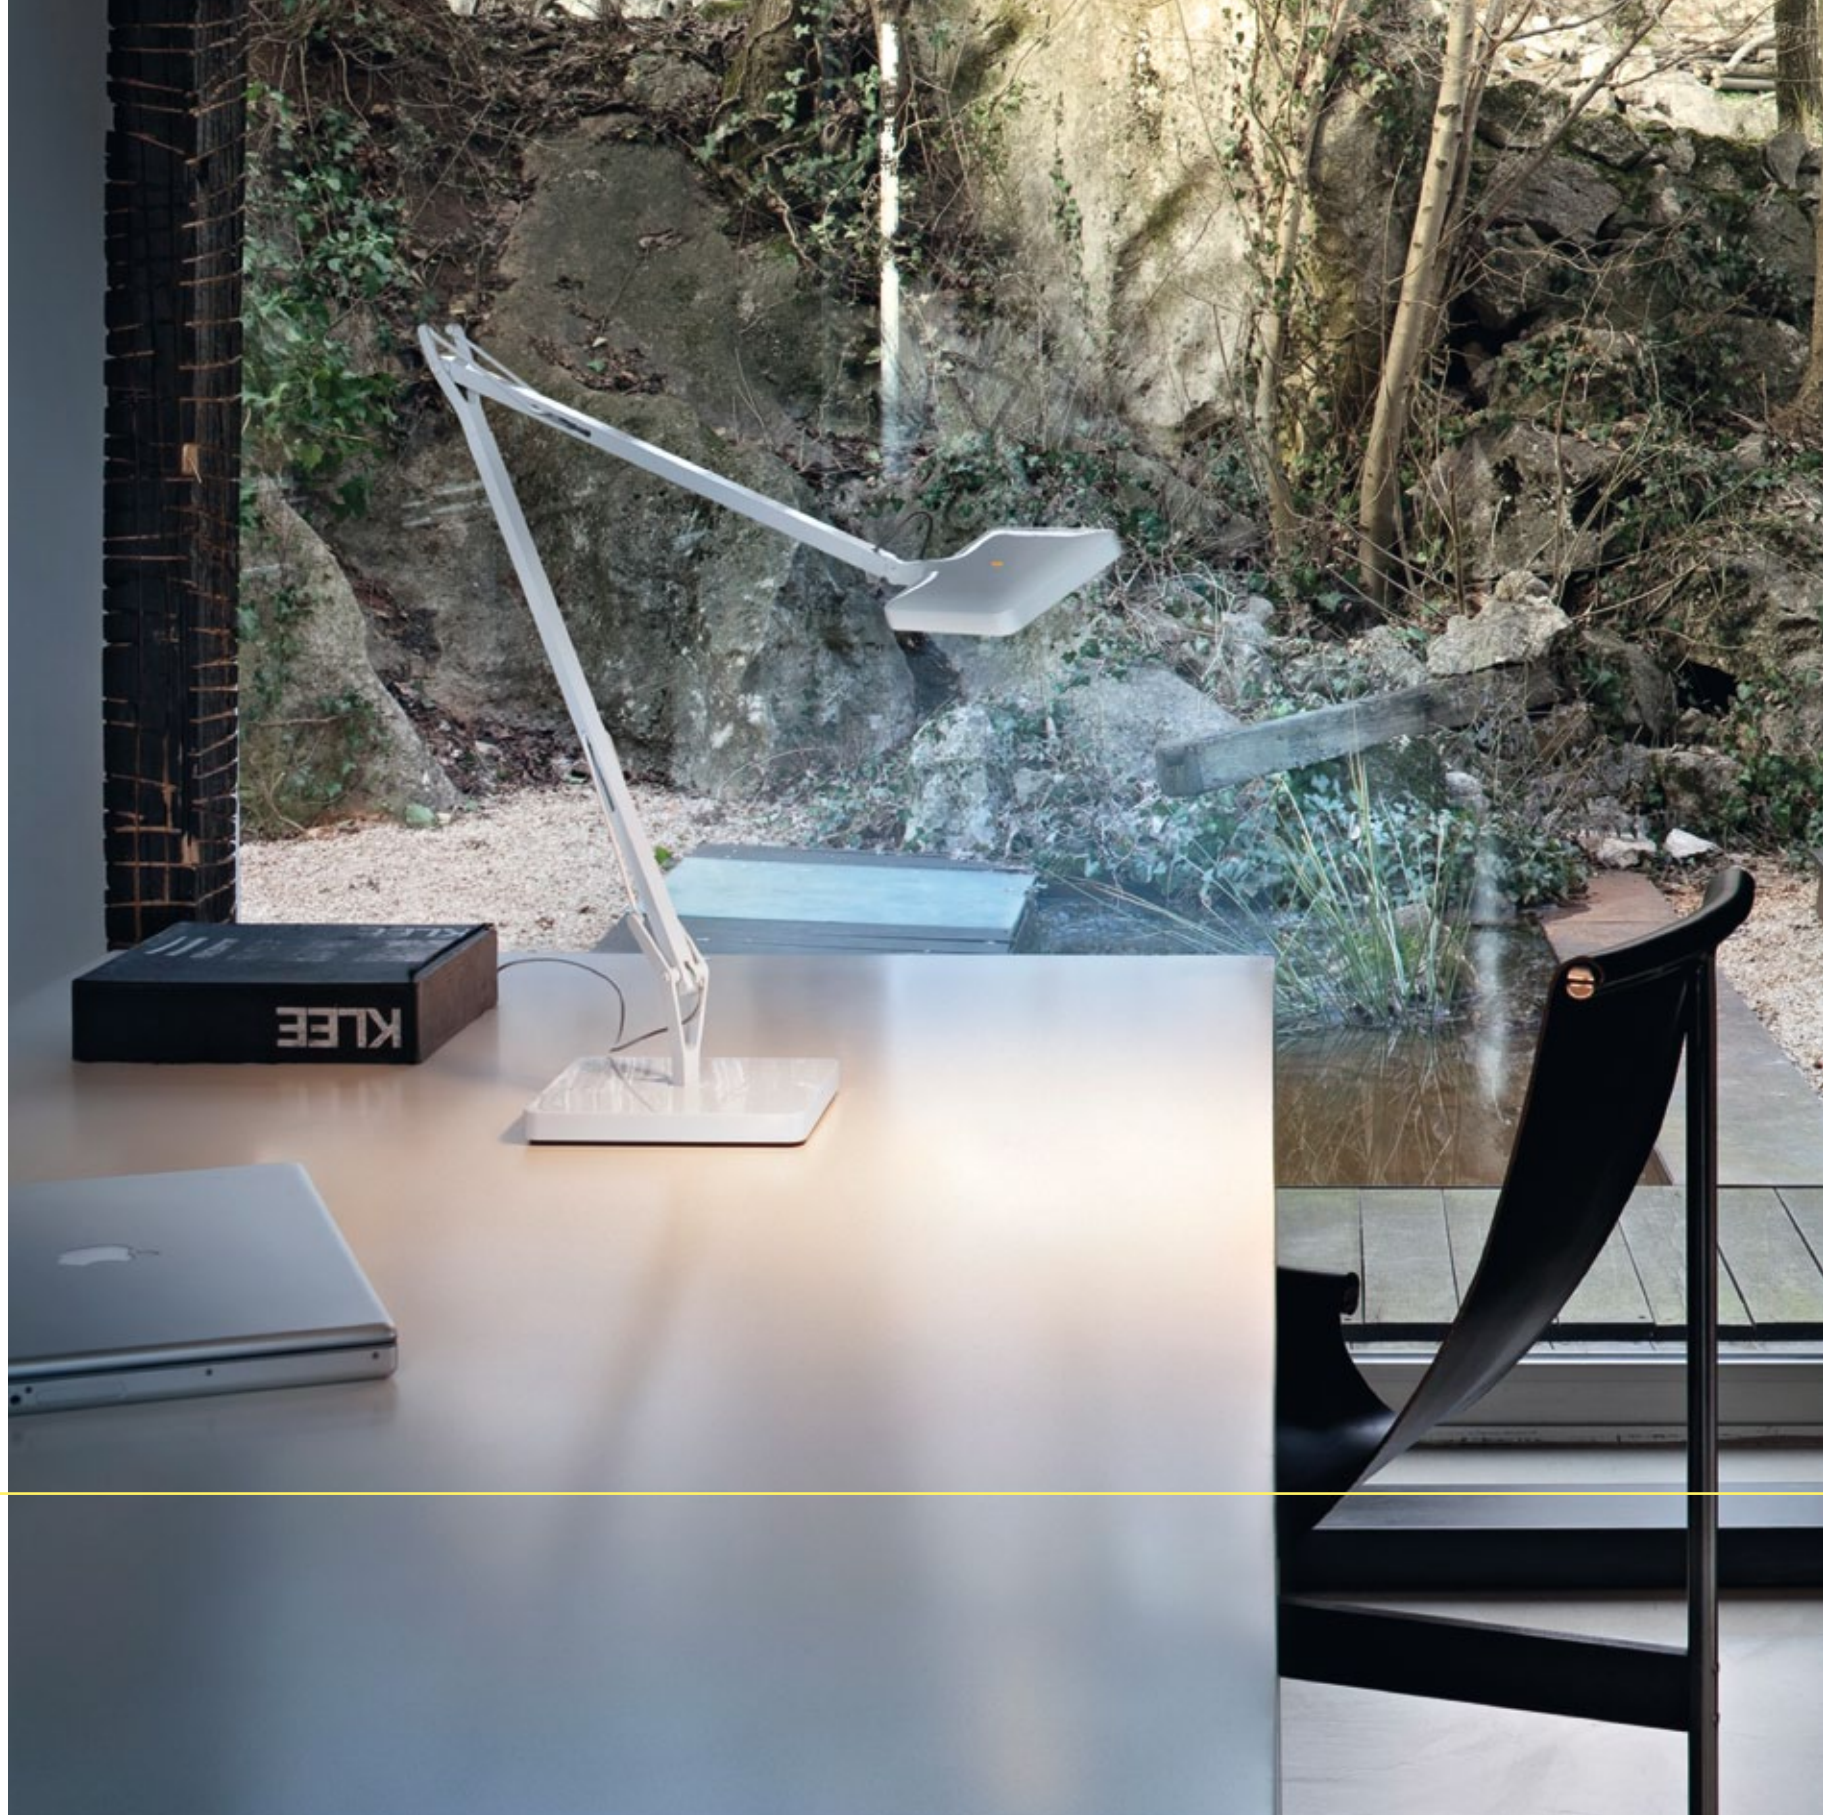

taking care of people comfort

with a double simple touch

easy switch, amazing technique.
The switch is a sensor placed inside the head.

with respect for nature

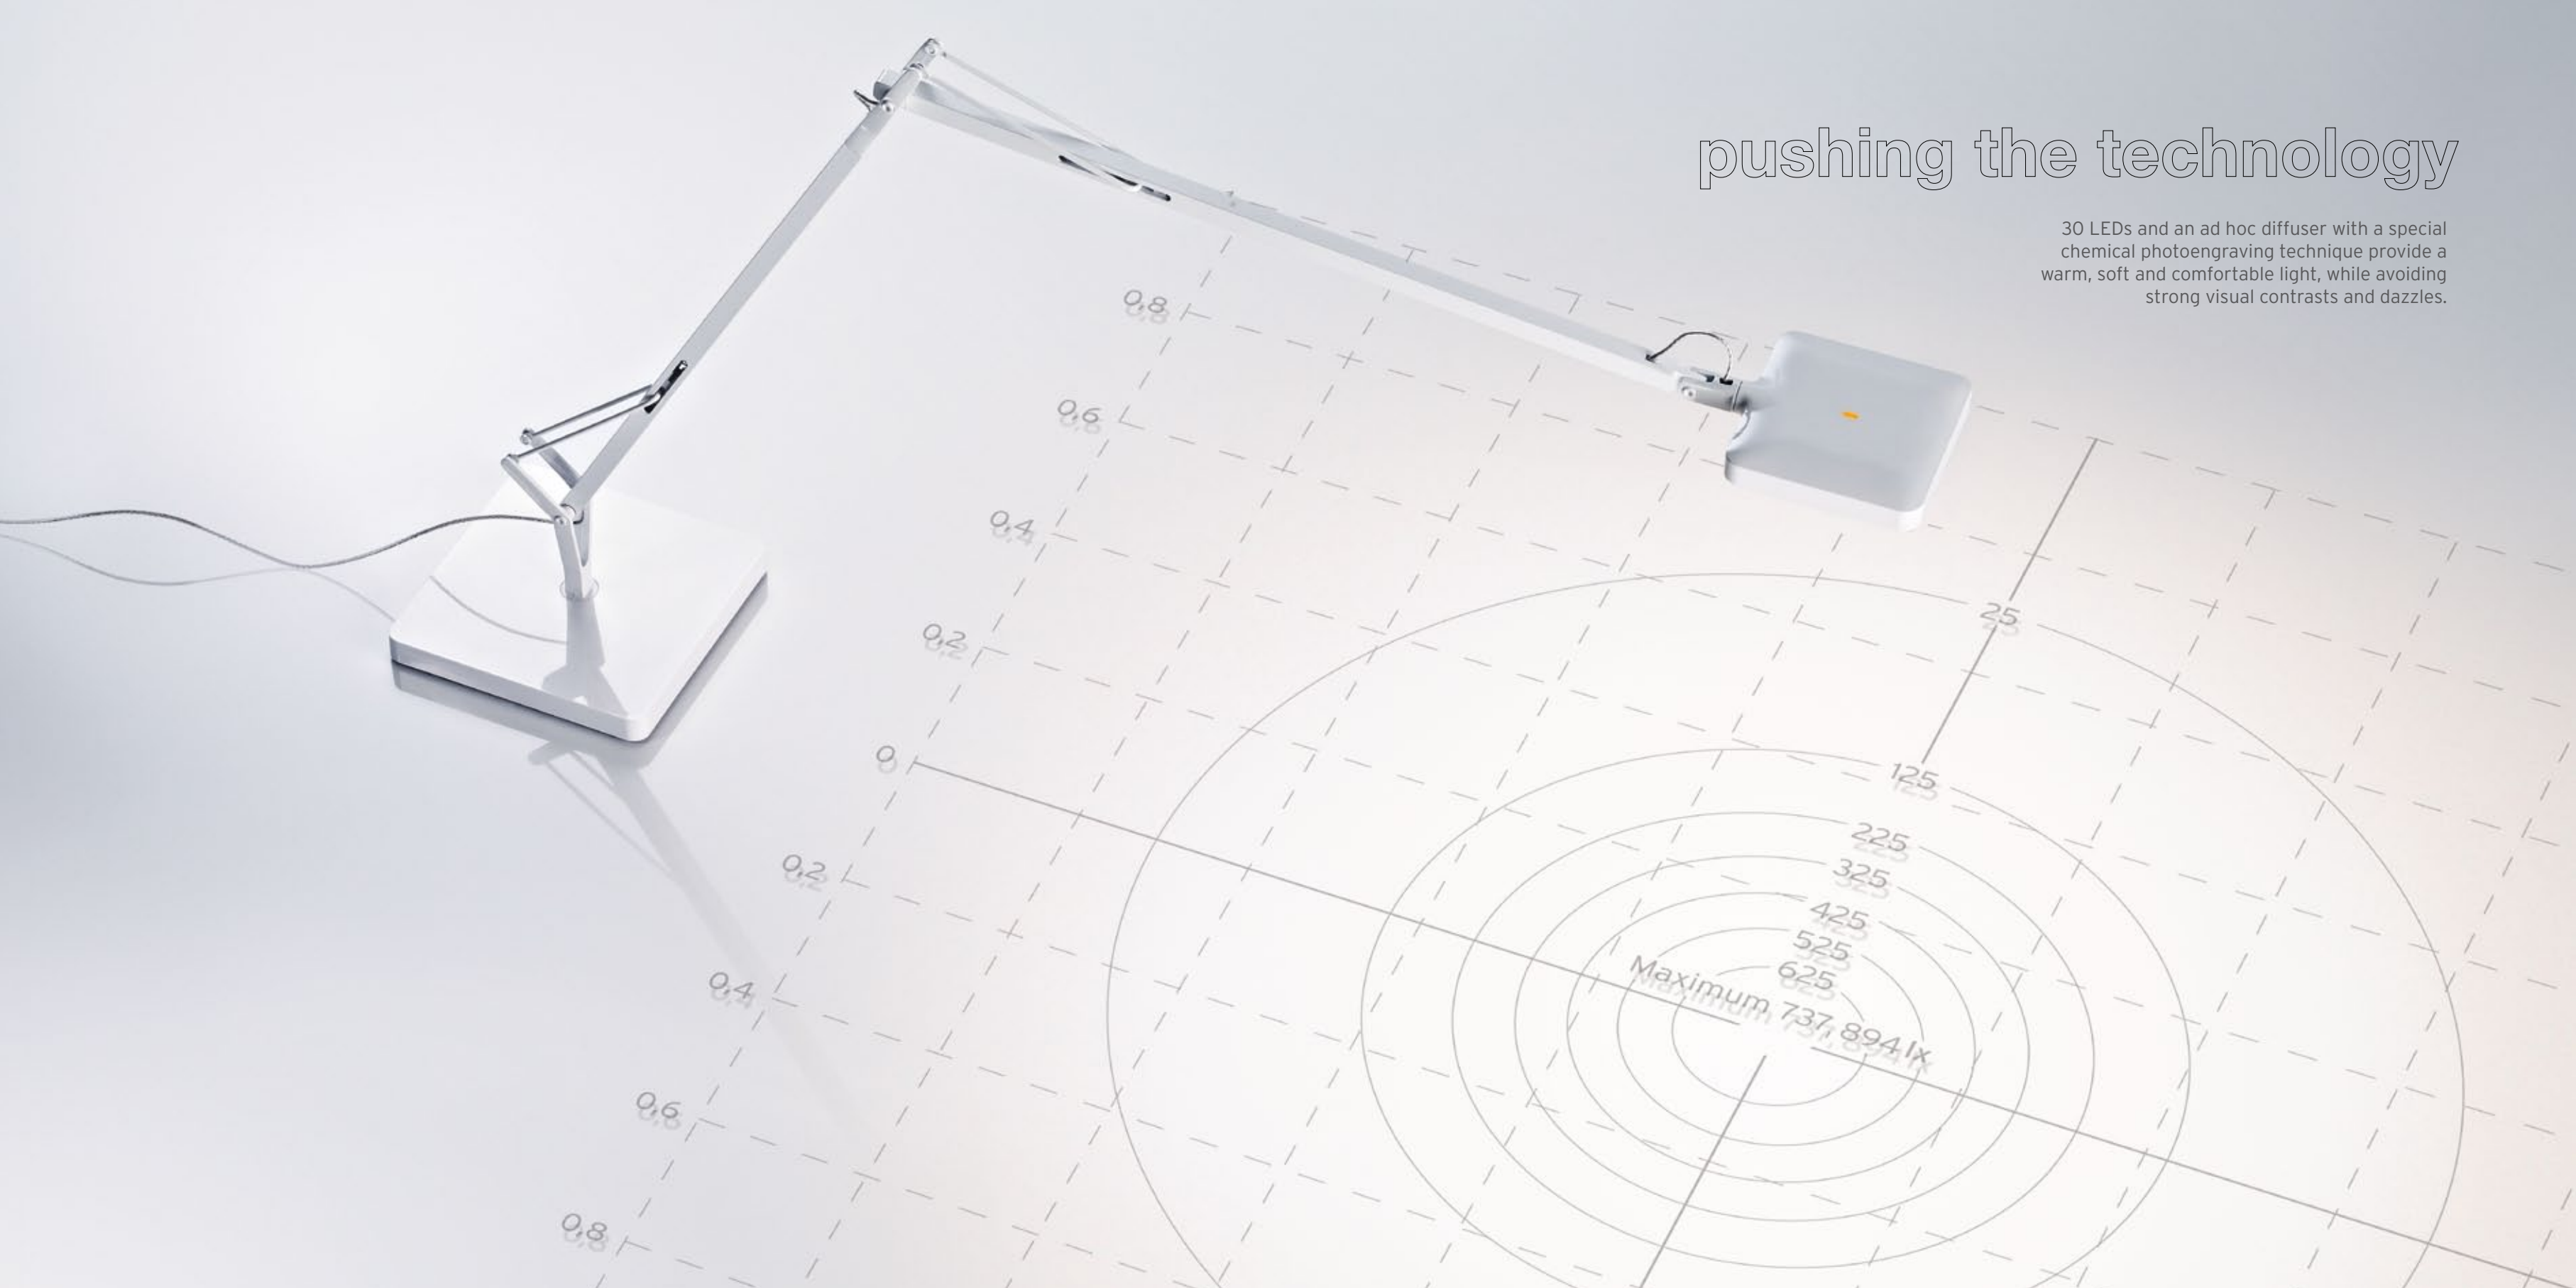

environmental care

- high efficiency
- non toxic paint
- recycable materials
- total power consumption only 8 W.

pushing the technology

30 LEDs and an ad hoc diffuser with a special chemical photoengraving technique provide a warm, soft and comfortable light, while avoiding strong visual contrasts and dazzles.

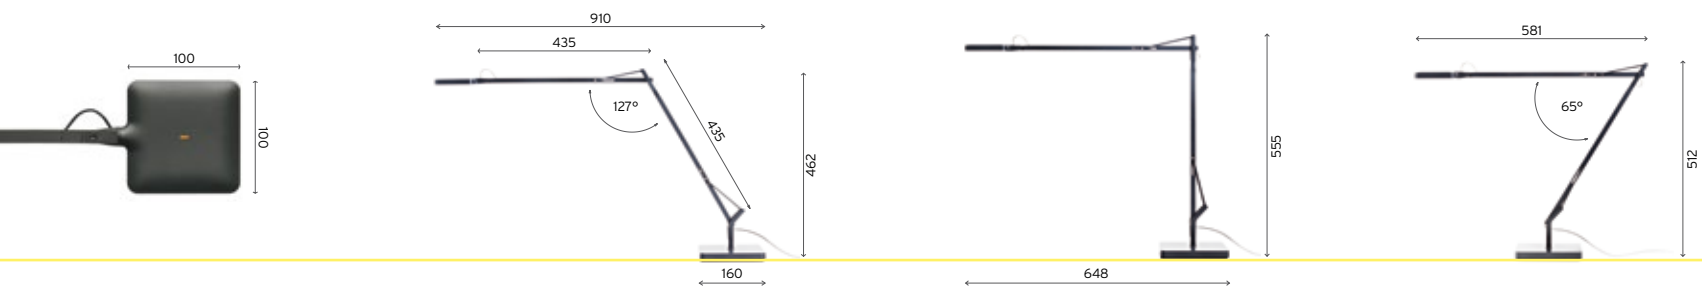

for public benefit

Total control of light and ultraflexible swivel system which make this luminaire suitable also for professional applications, to light work areas for example, fully complying with the European and national directives in force.

with the best design

head : die-cast aluminium
base: ABS+steel

diffuser PMMA

swivel head
355 ° rotation
pantograph arm
360° rotation

on/off switch
FLOStouch™ technology

power consumption 8 W
Color Rendering Index 95

30 TOP LED 2700 K
270 LUMEN
